PROFESSIONAL EXPERIENCE

Toronto Dominion Bank

01/2023 - 08/2023 | Toronto, ON

Cloud DevOps Engineer

- Contributed to multiple initiatives for TD's Fraud Detection Integration Platform, infrastructure/QA testing-related tasks
- Azure **microservice-based architecture**, setup and configuration of various Azure service environments, **CI/CD** task orchestration using automated **Jenkins** builds and **XLRelease**.
- Communicated with Developers to deploy **laC**, based on E2E process and requirements. Also leveraged **Postman** for testing API token requests when moving to new service env(dev, test, pat, prod). In addition to Azure Eventhub(**Apache Kafka** Surface) and **Hashicorp Vault** setup.
- **Logging and Monitoring** Requests of **Java API** using **Datadog**, debugging logs to pinpoint errors.

BusPlanner Inc

05/2022 - 08/2022 | Waterloo, ON

Software Developer

- Worked directly on **SaaS** product BusPlanner Connect as part of an agile development team in BusPlanner, a company specializing in top-shelf route planning software and logistics applications.
- Utilized **ASP.NET MVC** framework, **C#**, **Javascript**, and knowledge of **SQL query design** to develop, test and debug code, including **C# REST web APIs** responsible for data manipulations on bus-routing information. As well as taking part in daily scrum meetings and collaborating with team members to contribute directly to company codebase

Segal LLP

09/2021 - 12/2021 | Toronto, ON

I.T. Networking Technician

- Provided helpdesk and technical support both remotely and in-office ranging from permissions access to software/hardware issues. Daily activities included updating/troubleshooting system hardware and software, monitoring company network and data security systems, including active directory, **network security group policy**, and email security.

Google CS Summer Institute

07/2019 - 08/2019 | Seattle, WA

Student Member

- Engaged in a Google-operated project-based curriculum where members learn and utilize coding languages including **HTML/CSS**, **Python**, and **Javascript** to complete various tasks including the deployment of a webapp project using **Google AppEngine**.
