Experience

Toronto Dominion Bank
Cloud DevOps Engineer

Jan 2023 - Aug 2023

- Assisted with multiple initiatives for TD's Fraud detection integration platform, cloud/infrastructure related tasks
- Azure microservice based architecture, setup and configuration of various Azure service environments, CI/CD releases and deployments using automated Jenkins builds and XLRelease.
- Communicated with Developers to deploy IaC, based on E2E process and requirements. Also leveraged Postman for testing API token requests when moving to new service env(dev,test,pat,prod). In addition to Eventhub and Hashicorp Vault setup.
- Logging and Monitoring Requests of Java API using Datadog, debugging logs to pinpoint errors.

Georef
Software Developer

May 2022 - Aug 2022

- Worked directly on SaaS product named BP(BusPlanner) Connect as part of an agile development team in Georef, a company specialising in top-shelf route planning software and logistics applications.
- Utilised ASP.NET MVC framework, C#, Javascript,, and knowledge of C# REST API and SQL query design to develop, test and debug code taking part in daily scrum meetings, collaborating with team members to contribute directly to company codebase

Segal LLP
I.T. Networking Technician
Sept 2021 - Dec 2021

- Provided helpdesk and technical support both remotely and in-office ranging from permissions access, to software/hardware issues. Daily activities included updating/troubleshooting system hardware and software, including monitoring of company network and data security systems, including active directory, virus protection, network security group policy, and email security.
Google CS Summer Institute
Student Member

Jul 2019 - Aug 2019

- Engaged in a Google operated project-based curriculum where members learn and utilise coding languages including HTML/CSS, Python, and Javascript to complete various tasks including the deployment of a webapp project using Google Appengine.
